Course Time: Tue/Thr 12:00-1:15, Shaffer 202
Instructor: Marcus Chang (mchang at cs.jhu.edu)
TA: Nishikant Deshmukh (nishikant at jhu.edu)
Office hours: By appointment

This course is an introduction to fundamental concepts of networked embedded systems and
wireless sensor networks. It is intended for juniors, seniors and first year graduate students in
Computer Science and other engineering majors with the prerequisite background. Covered
topics include: embedded systems programming concepts, low power and power aware design,
radio technologies, and communication protocols for low-power networks.

Laboratory work consists of a set of programming assignments that consider a set of the issues
described in class.

Prerequisites: 600.226, 600.120 and 600.344/600.444 or instructor’s consent.

Please use Blackboard for handing in assignments.

Discussions and announcements will be posted on Piazza.
